RE: Request for information pursuant to Section 9005 of the Resource Conservation and Recovery Act (RCRA), as amended, 42 U.S.C. 6991d, regarding the Underground Storage Tank systems (UST systems) located at the following facility: Sharks Cove Marina, 57 Madison Avenue, Fenwick Island, DE 19944 (5000391)

REFERENCE NUMBER: 118-007

Dear Mr. Jurist:

Subtitle I of the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6991 et seq. (RCRA) and regulations promulgated pursuant thereto at 40 C.F.R. Part 280, regulate underground storage tanks (USTs) used to contain regulated substances including, but not limited to, petroleum products (e.g., gasoline and crude oil). In order to conduct a study, take any corrective action or enforce the provisions of Subtitle I, Section 9005(a) of RCRA, 42 U.S.C. 6991d(a), authorizes the U.S. Environmental Protection Agency, (EPA) among other things, to require owners and/or operators of USTs to furnish information relating to such tanks, their associated equipment, and their contents.

As a follow up to the EPA inspection on August 18, 2017 at the above referenced facility and as an owner and/or operator of the UST Systems at the Facility, and owner and/or operator of the Facility itself, you are required to submit the following information within 14 calendar days:

1. Based on information collected during that EPA inspection, it is EPA's understanding that there is currently one (1) USTs located at the Facility which may be described as follows:

Tank #s	Capacity (gallons)	Substance Stored	Material of tank	Material of Piping	Type of Piping	Date of Installation
T1	2,800	Regular	FRP	FRP	Pressure	August 1998

\*FRP is fiberglass reinforced plastic

If the table above has incorrect information, please a) describe in detail your reasons as to why such point is inaccurate; and, b) provide documentation supporting any assertion of inaccuracy.

1. Please state the name and address of each owner ("owner" is defined at Delaware Regulations Governing Underground Storage Tank Systems (DRGUSTS) Part A

Section 2) of all USTs and/or UST systems at DRGUSTS Part A Section 2) presently at the Facility. Also, state the dates of their respective ownership of such USTs and/or UST systems.

- N/A
2. Please state the name and address of each operator ("operator" is defined at DRGUSTS Part A Section 2) of the USTs and/or UST systems located at the Facility, and the dates of their respective operation of such USTs and/or UST systems.
  3. State the identity, contents, and location within the Facility of any other USTs not mentioned in the above table.
  4. DRGUSTS Part B 1.04 requires USTs be equipped with spill containment around the fill pipe and overfill equipment that will automatically shut off flow into the tank or alert the transfer operator when the tank is no more than 90% full by restricting the flow into the tank or triggering a high level alarm. At the time of the inspection, there was a vehicle parked over the fill port therefore the inspector could not observe spill or overfill equipment.
    - a. State yes or no, is the UST equipped with spill containment around the fill pipe?
    - b. If yes, provide a photograph of the fill pipe which shows the spill containment.
    - c. State yes or no, is the UST equipped with overfill prevention equipment that will automatically shut off flow into the tank or alert the transfer operator when the tank is no more than 90% full by restricting the flow into the tank or triggering a high level alarm?
    - d. If yes, provide a description of the method of overfill prevention and provide a photograph.
    - e. If no spill and/overfill equipment has been installed on the UST, explain.
  5. DRGUSTS Part B 1.07 requires owners and operators provide a method or combination of methods of release detection which can detect a release from any portion of the tank and connected piping that routinely contain product. DRGUSTS Part B 1.08 states that monitoring systems shall consist of inventory control and one or more of another method. At the time of the EPA inspection, the method of tank release detection could not be determined by the EPA inspector.
    - a. State yes or no, has tank release detection pursuant to DRGUSTS been performed on the UST at the facility from January 2013 through the present?
    - b. If yes, describe the method (or methods) of tank release detection used from January 2013 through the present and provide copies of monthly tank release detection records from January 2013 through the present.
    - c. If no, explain.
  6. DRGUSTS Part B 1.07 requires owners and operators provide a method or combination of methods of release detection which can detect a release from any portion of the tank and connected piping that routinely contain product. DRGUSTS Part B 1.09A states in part that underground piping which routinely contains regulated substance under pressure must conduct an annual line tightness test. At the time of the EPA inspection, the EPA inspector could not find evidence of annual line tightness testing.

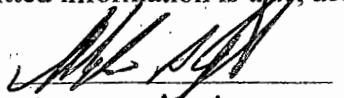

- a. State yes or no, has the product line been tightness tested annually pursuant to DRGUSTS from January 2013 through the present?
  - b. If yes, provide copies of any and all line tightness tests performed on the product line performed from January 2013 through the present.
  - c. If no, explain.
7. DRGUSTS Part B 1.07 requires owners and operators provide a method or combination of methods of release detection which can detect a release from any portion of the tank and connected piping that routinely contain product. DRGUSTS Part B 1.09A states in part that underground piping which routinely contains regulated substance under pressure must be equipped with a line leak detector and the line leak detector must be tested annually. At the time of the EPA inspection, the EPA inspector verified the UST was equipped with a line leak detector, but could not find evidence of annual line leak detector testing.
- a. State yes or no, has the line leak detector been tested annually pursuant to DRGUSTS from January 2013 through the present?
  - b. If yes, provide copies of any and all line leak detector tests performed on the line leak detector from January 2013 through the present.
  - c. If no, explain.
8. DRGUSTS Part F requires owners and operators maintain financial responsibility on underground storage tanks.
- a. State yes or no, has there been a method of financial responsibility on the UST located at the facility pursuant to DRGUSTS Part F from January 2013 through the present?
  - b. If yes, provide a copy of the insurance certificates and any attachments.
  - c. If no, explain.

All information required by this letter must be submitted to this office to the attention of Marie Owens Powell, Compliance/Enforcement Officer, RCRA Underground Storage Tank Branch, 3LC31, 1650 Arch Street, Philadelphia, PA 19103 no later than **14 calendar days** from the date of your receipt of this letter. You must also include with the information submitted the following signed and dated certification:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate and complete.

As used herein, the term documents means: writings (handwritten, typed or otherwise produced or reproduced) and includes, but is not limited to, any invoices, checks, receipts, bills of lading, weight receipts, toll receipts, correspondence, offers, contracts, agreements, deeds,

leases, manifests, licenses, permits, visas, proposals, notices or instructions, entry, minutes of meetings, memoranda, notes, calendar or daily entries, agendas, bulletins, notices, announcements, charts, maps, photographs, drawings, manuals, brochures, reports of scientific study or investigation, schedules, price lists, telegrams, teletypes, phono records, magnetic voice, or video records, tapes, summaries, magnetic tapes, punch cards, recordings, discs, computer disks, computer printouts, or other data compilations from which information can be obtained or translated.

With regards to the Small Business Regulatory Enforcement and Fairness Act (SBREFA), please see the Information for Small Businesses Information Sheet, enclosed, which might be applicable to your company. This enclosure provides information on contacting the SBREFA Ombudsman to comment on federal enforcement and compliance activities and provides information on compliance assistance. As noted in the enclosure, any decision to participate in such program or to seek compliance assistance does not relieve you of your obligation to respond in a timely manner to an EPA request or other enforcement action, create any rights or defenses under law, and will not affect EPA's decision to pursue this enforcement action. To preserve your legal rights, you must comply with all rules governing the administrative enforcement process. The Ombudsman and fairness boards do not participate in the resolution of EPA's enforcement action. EPA has not made determination as to whether you (or your company) are covered by the SBREFA.

Failure to provide this information in the manner requested herein and/or within the specified time may result in the commencement of an enforcement action by EPA pursuant to Section 9006 of RCRA, 42 U.S.C. 6991e.

This collection of information requirement is not subject to review by the Office of Management and Budget pursuant to the Paperwork Reduction Act, 44 U.S.C. 3501-3520.

You are entitled to assert a claim of business confidentiality covering any part or all of the submitted information in the manner described in volume 40 of the Code of Federal Regulations (C.F.R.), Section 2.203(b). Information subject to the claim of business confidentiality will be made available to the public only in accordance with the procedures set forth in 40 C.F.R. Part 2, Subpart B. Unless a business confidentiality claim is asserted at the time the information is submitted, EPA may make such information available to the public without further notice to you.

If you have any questions concerning this matter, please contact Marie Owens Powell at 215-814-3384.

Sincerely,

Carol Amend, Associate Director  
Land and Chemical Division

# Line Tightness Test Results

Company Name:	Sharks Cove Marina	Job ID Number:	5424
Site Name:	Sharks Cove Marina	Technician Name:	Jason Dickens
Address:	38931 Madison Avenue Fenwick Island, DE 19944		
Facility ID:			
Test Date:	03/08/2018		

## Line Tightness Test Data

Product:	Midgrade	Tank ID:	1	Start Time:	10:15
Approx Length:	200	STP MFG:	Red Jacket 3/4 HP	End Time:	10:45
Size:	2	Operating Pressure:	27	Total Test Time:	30mins
Line Material:	SWF	Test Pressure:	50	Final Leak Rate:	0.0025
Wall Type:	Single	Isolation Dispenser:	Solenoid	Impact Valves Operational:	N/A
Boot Back:	N/A	Isolation Pump:	Check Valve	Check Valve Location:	N/A
Line Type:	Pressure	Initial Cylinder Level:	.0840	Result:	Pass
		Final Cylinder Level:	.0815		

Line tightness testing conducted in accordance with the procedures and limitations of the PetroTite pipeline tester. A consistent leak rate of .01 gph or higher at 150% of normal operating pressure is considered a failure. The owner or operator of the UST system is required to report all failures to the appropriate agency within 24 hours.

The results of any sampling, testing, or monitoring shall be maintained for at least five years, or for another reasonable period of time determined by the department or delegated agency, except that the results of tank tightness testing conducted in accordance with CFR 40 Part 280.44 shall be retained until the next test is conducted.

# Automatic Line Leak Detector Test Results

Company Name: Sharks Cove Marina  
Site Name: Sharks Cove Marina  
Address: 38931 Madison Avenue Fenwick Island, DE 19944  
Facility ID:  
Test Date/Time: 03/08/2018 09:04:44 am

Job ID Number: 5424  
Technician Name: Jason Dickens

Product: Midgrade	Make: Veeder Root	Operating Pressure: 27	Result: Pass
Tank ID: 1	Model: FX1V	Holding Pressure: 16	
LD Type: Mechanical	Serial#: 8640	Bleedback (ml): 78	
<b>Additional Data For Mechanical Leak Detectors Only</b>			
Metering Pressure: 11			
Step Through Time: 3			

Leak detector testing conducted in accordance with the procedures and limitations of the Petrotite leak detector tester. A leak is simulated at the highest point in the line using the Petrotite calibrated to 3 gph at a metering pressure of 10 psi. The owner or operator of the UST system is required to ensure any failed leak detector is replaced before placing the line back in-service.

The results of any sampling, testing, or monitoring shall be maintained for at least five years, or for another reasonable period of time determined by the department or delegated agency, except that the results of tank tightness testing conducted in accordance with CFR 40 Part 280.44 shall be retained until the next test is conducted.

# EZY3 Locator Plus Data Sheet

Date	03/08/2018	PBS # (NEW YORK):	
Total Tank Volume:	2800	Tank #:	1
Product Volume:	130	Location	Sharks Cove Marina
Ullage Volume:	2670		38931 Madison Avenue
Product Type:	Midgrade		Fenwick Island, DE 19944

## Key:

A = Distance from bottom of tank to grade  
 B = Top of tank to grade  
 C = Diameter of tank  
 D = Fuel level from bottom of tank

E = Distance from grade to ground water level  
 F = Ground water level as it relates to the tank bottom  
 G = Difference between fuel level and ground water level  
 H = Inches of water in tank

A: 70	Pressure Sensor
B: 15	PSI (1): 0.156
C: 55	PSI (2): 0
D: 6	PSI (3): 0.156
E: 60	PSI (4): 0.36
F: 10	PSI (5): -0.204
G: -64	PSI (6): 0.296
H: 0	PSI (7): 0.5

Acoustic Test			Water Intrusion Calibration			
	Time	Pressure	Cal #1	Cal #2	Cal #3	Average
Blower Started	9:25	0	100	90	90	93.33
Test Pressure Reached	9:30	0.500	<b>Test Began</b>		<b>"A" Factor</b>	
Blower Turned Off	9:33	0.587	10:00			.025
Test Began	9:36	0.586	<b>Test Ended</b>		<b>Time Of Test</b>	
Test Ended	10:33	0.581	10:30			29.630

## THE ACOUSTIC CHARACTERISTICS OF A LEAK REVEALS

### TIGHT TANK

THIS UNDERGROUND STORAGE TANK PASSES THE CRITERIA SET FORTH BY THE U.S. EPA.

### ULLAGE (DRY) PORTION LEAK

THIS UNDERGROUND STORAGE TANK FAILS THE CRITERIA SET FORTH BY THE U.S. EPA.

### BELOW PRODUCT LEVEL (WET) PORTION LEAK

THIS UNDERGROUND STORAGE TANK FAILS THE CRITERIA SET FORTH BY THE U.S. EPA.
